

DOCLABEL

DocLabel provides instant PDF Page Labelling functionality directly inside MS Office. Labels are tags used inside Acrobat to 'name' pages. Which inside Acrobat means you can navigate to page names instead of numbers.

DocLabel provides a mechanism to add these tags to your source documents for automatic inclusion and conversion in the PDF version of the your documents.

The built in numbering systems available include:

- Roman Numerals
(Uppercase and Lowercase: i,ii,III,IV)
- Decimal Numbering Systems
(1..100)
- AlphaNumeric Numbering
(A..Z, AA..ZZ, AAA...ZZZ)
- Custom Prefix Function
(CH1,S1:Ch2,Chapter 2:)
- Auto-Renumbering Sequences
(Start from Previous Number)
- Plain Text Labels (Intro,Index,TOC)

DocLabel has built in features to allow the author to specify which pages are to labelled and which naming convention to use
